

MOBILE APP
Proxi-Event

The best way to handle easily
and safely your visitors, in 6 steps!

1

Install

In just a few seconds with secured codes,
on one or several phones within the
same booth (you will receive your login details
on Friday 7th January 2022).

2

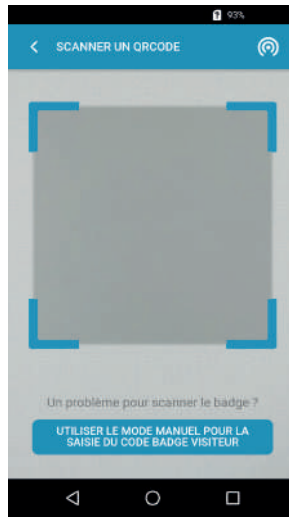

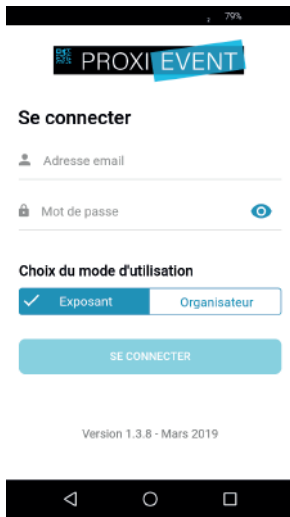

Scan

My visitors' QR code on their badge even
without internet connection.
As soon as it is scanned,
it is saved on the web and on Proxi's servers.

3

Comment

I can write useful and technical comments about
the exchange while scanning or after. But I can
also write down actions to undertake (appointments,
booklet, quotation, sample...). I will find my visitors
contacts by searching them and in alphabetical order.

4

Share

By email, each scan during the
trade fair with colleagues for
commercial follow-up, with useful
information about visitors.

5

Save

Automatically on my phone
or several phones.
I can see, just on a clic, all my visitors scans.

6

Export

From Friday 14th at 9:00 AM,
I will be able to export the whole of my scans.
The file will contain the complete postal address as
well as e-mail address, phone number, profession,
activity and my notes from the 4 menus of course.
